

RELEASE NOTES 42.0.3.1

The *PostalOne!* system Release 42.0.3.1 is scheduled for implementation on January 21, 2016 to introduce software fixes to the system. This includes corrections to issues previously identified in a prior release.

These Release Notes provide the contents of the release and affected subsystems.

Contents of this document are subject to change.

Please note the following regarding the Mail.dat client download, there is an optional new client for Release 42.0.3.1

Mail.dat client	Status
42.0.0.0_PROD	Download required. All older versions will expire.
42.0.3.0_PROD	Required to resolve Mail Anywhere defect 8826, otherwise the download is optional.

1. Corrections to Known Issues

The information for this section is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs).

1.1 BMEU

An issue has been corrected that previously resulted in duplicate lines in Section E for Parcel Select postage statements (PS Form 3605). The issue duplicated lines E1 – E8 on Parcel Select postage statements when the single-piece weight was blank and prevented the postage statement from finalization. {8902 B}

1.2 International Postage Statement Processing

Rate validation for Priority Mail International (PMI) postage statements (PS Form 3700) has been updated to correctly check Commercial Plus™ Price (CPP) contract rates when applicable. Prior to this release, the validation check for PMI postage statement lines E1, E2, and E3 only checked published rates and not CPP contract rates as it should have. {8877 B}

1.3 Scan Based Payments

Scan-Based Payment (SBP) has been updated to enable creation of postage due statements for Priority Mail. A postage statement line mapping defect resulted in an invalid rate ingredient error that prevented Priority Mail postage due statements from being created. {8895 B}
